Notes:

(1) The issued capital of the Group differs from that of the Company as a result of applying the reverse acquisition accounting in accordance with FRS 103. It represents the total of the deemed cost of acquisition immediately before the Acquisition and issue/placement of new shares by the Company subsequent to the Acquisition.

* Other reserves comprise capital reserves of subsidiary companies; gain on sale of treasury shares and foreign currency translation differences.

(d)(ii). *Details of any changes in the company's share capital arising from rights issue, bonus issue, share buy-backs, exercise of share options or warrants, conversion of other issue of equity securities, issue of shares for cash or consideration for acquisition or for any other purpose since the end of the previous period reported on. State also the number of shares that may be issued on conversion of all the outstanding convertibles as at end of the current financial period reported on and as at end of the corresponding period of the immediately preceding financial year.*

The Company did not issue any shares during the period. As of 31 December 2015, the number of issued shares was 1,447,782,830, of which 51,878,300 shares were held as treasury shares. As of 31 December 2014, the number of issued shares was 1,447,782,830, of which 30,500,000 shares were held as treasury shares.

There were no outstanding convertibles as at 31 December 2015 and 2014.

(d)(iii). *To show the total number of issued shares excluding treasury shares as at the end of the current financial period and as at the end of the immediately preceding year.*

	Company

2. *Whether the figures have been audited or reviewed, and in accordance with which auditing standard or practice.*

This consolidated financial information has not been audited nor reviewed by the external auditors.

3 *Where the figures have been audited or reviewed, the auditors' report (including any qualifications or emphasis of a matter).*

Not applicable.

4 *Whether the same accounting policies and methods of computation as in the issuer's most recently audited annual financial statements have been applied.*

The accounting policies have been consistently applied by the Company and the Group, and are consistent with those used in the previous year, except for the changes discussed in Paragraph 5 below.

5. ***If there are any changes in the accounting policies and methods of computation, including any required by an accounting standard, what has changes, as well as the reason for, and the effect of, the change.***

Not applicable.

6. ***Earnings per ordinary share of the group for the current financial period reported on and the corresponding period of the immediately preceding year, after deducting any provision for the preference dividends; (a) Based on weighted average number of shares and (b) On a fully diluted basis (detailing any adjustments made to the earnings)***

Basic earnings per share amounts are calculated by dividing earnings for the period attributable to the equity holders of the Company by the weighted average number of ordinary shares outstanding during the period. Diluted earnings per share is calculated on the same basis as the basic earnings per share except that the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential ordinary shares. The Company has no dilutive potential ordinary shares as at 31 December 2015.

Earnings per share (Rp)	Group – Full Year		Change %
	31/12/2015	31/12/2014	
Based on weighted average number of share	41	535	(92.2)
Based on a fully diluted basis	41	535	(92.2)

7. **Net asset value (for the issuer and group) per ordinary share based on issued share capital of the issuer at the end of the:-**

The net asset value per share for the Group is calculated using the Group's net asset value attributable to equity holders as at end of each period divided by the issued share capital of 1,395,904,530 and 1,417,282,830 (excluding 51,878,300 and 30,500,000 held as treasury shares as of 31 December 2015 and 31 December 2014.

	Group		Company	
	31/12/2015	31/12/2014	31/12/2015	31/12/2014
Net asset value per share (Rp)	10,309	10,322	8,195	8,127

- 8 **A review of the performance of the group, to the extent necessary for a reasonable understanding of the group's business. It must include a discussion of (a) any significant factors that affected the turnover, costs, and earnings of the group for the current financial period reported on, including (where applicable) seasonal or cyclical factors; and (b) any material factors that affected the cash flow, working capital, assets or liabilities of the group during the current financial period reported on.**

* Comprises mainly internal CPO sales to the Group's own refineries

** Comprises mainly cooking oil, margarine and copra-based products

Financial Performance

Overview: It has been a challenging year. The global economic slowdown and weak market sentiments have put significant pressure on the Group's agriculture crops. In particular, CPO prices (Rotterdam CIF) declined 25% to an average of US\$615 per tonne in FY2015. Rubber prices (RSS3 SICOM) have been on a downward trend since 2012, declining 50% to end at an average of US\$1,560 per tonne in FY2015.

Lower commodity prices for agriculture crops and the weakened Indonesian Rupiah have affected negatively our FY2015 results. In light of this, the Group tightened its cash flow and focused its strategies on cost control initiatives, prioritising on the maintenance of immature plantings and the expansion of capacity to support the increased production.

Revenue: The Group's consolidated revenue (after elimination of inter-segment sales) declined 10% to Rp3.8 trillion in 4Q2015 on lower sales achieved by both Divisions. FY2015 revenue decline 8% to Rp13.8 trillion was attributable to lower revenue contribution from the Edible Oils & Fats (EOF) Division, partially offset by higher external sales from the Plantation Division.

The Plantation Division's total revenue (both inter-segment and external) declined 10% to Rp2.6 trillion in 4Q2015 and down 11% to Rp9.1 trillion on full year basis. This reflected mainly lower average selling prices of palm products, but partially offset by higher sales volume of palm products and higher sugar sales. Internal CPO sales at market price to EOF Division increased 8% in 4Q2015, but declined 27% on full year basis. In line with lower average selling prices of palm products, Plantation Division achieved lower EBITDA earnings in this quarter as well as on year-to-date basis.

Revenue from the EOF Division declined 4% in 4Q2015 mainly attributable to lower average selling prices, which offset by higher sales volume of edible oil products. The sales decline of 14% in FY2015 was attributable to both lower selling prices and sales volume of edible oil products. On a positive note, the EOF Division achieved higher EBITDA earnings in 4Q2015 and FY2015 on lower raw material costs which primarily comprised of CPO.

Gross Profit: The Group's gross profit in 4Q2015 and FY2015 declined 25% and 22% respectively over the same periods last year. The decline was primarily attributable to lower average selling prices of palm products, however this was partly offset by higher profit contribution from the EOF Division.

Other Operating Expenses: The Group recorded lower Other Operating Expense in FY2015 mainly attributable to reversals of provision for decline in market values of inventories.

Selling and Distribution Expenses (S&D): The Group reported higher S&D in 4Q2015 and FY2015 mainly due to higher marketing and promotion expenses, as well as higher freight charges.

General and Administrative Expenses (G&A): The Group reported lower G&A in 4Q2015 and FY2015 mainly on lower professional fees, travelling and staff benefits.

Foreign exchange (losses)/gains were principally attributable to the translation of US dollar and Singapore dollar denominated loans, assets and liabilities. The Group recognised foreign currency gains of Rp192 billion in 4Q2015 as the Indonesian Rupiah strengthened against the US Dollar during the quarter. On full year basis, the Group reported net foreign exchange losses of Rp290 billion which were mainly attributed to the weakening of Indonesian Rupiah against US dollar (Rp13,795/US\$ as of 31 December 2015 versus Rp12,440/US\$ in last year end).

Share of results of associate companies: These were mainly relating to (i) Heliae, a R&D development stage company which engages in the development of technology solutions for the commercial algae production of a variety of potential uses including food and feed, fertilizer, chemicals and pharmaceuticals; and (ii) FP Natural Resources Limited (FPNRL), which in turn holds 50.9% stake in Roxas Holdings Inc. (Roxas), the largest integrated sugar business in the Philippines. The Group's share of losses from associate companies were Rp85 billion in FY2015 compared to Rp150 billion losses in FY2014, mainly reflecting lower losses from Heliae.

Share of results of a joint venture: This was related to CMAA, a 50% joint venture in Brazil. The Group's share of losses from CMAA were Rp14 billion in 4Q2015 and Rp172 billion in FY2015, compared to Rp11 billion and Rp29 billion of profit in the comparative periods in 2014. The losses in 2015 were principally due to lower prices of sugar and lower selling prices of electricity generation.

Gain arising from changes in fair values of biological assets: The Group adopts annual valuation of the biological assets (which primarily comprise of oil palm, rubber and sugar cane plantations), which is in line with the industry practice. The Group recognised Rp20 billion loss in December 2015 compared to Rp60 billion gains last year. This was mainly due to a higher discount rate and lower CPO price projections, but partly offset by the effects of lower inflation and cost assumptions.

Profit from Operations: The Group reported lower Profit from Operations in 4Q2015 mainly due to lower gross profit, loss arising from changes in fair values of biological assets and higher selling and distribution expenses, but partially offset by foreign currency gains and lower share of losses of associate companies. On full year basis, Profit from Operations dipped 49% on lower gross profit, higher foreign exchange losses, higher selling & distribution expenses, loss arising from changes in fair values of biological assets and share of losses from CMAA.

Financial Income/Expenses: The Group recorded lower financial income in 4Q2015 and FY2015 compared to the comparative periods in 2014 due to lower fixed deposit placements. The Group recorded lower financial expenses in 4Q2015 and FY2015.

Income Tax Expense: The high effective tax rates in 4Q2015 and FY2015 were mainly due to non-deductible expenses and share of losses of associate and joint venture companies which are not available for set-off against profit from other group's entities.

Net Profit After Tax (NPAT): The Group reported lower NPAT of Rp310 billion and Rp299 billion in 4Q2015 and FY2015 respectively, declining 23% and 78% over the comparative periods in 2014. The decline was primarily due to lower profits from operations as explained above.

Core Net Profit After Tax: The Group achieved core profit of Rp168 billion in 4Q2015 and Rp555 billion in FY2015, declining 58% and 60% respectively over the comparative period in last year.

Other comprehensive income – The foreign currency translation relates to the investments in associate and joint venture companies, which are denominated in US dollar and Brazilian Reals, respectively. The Group recognised translation losses of Rp95 billion in FY2015 compared to Rp64 billion in FY2014 arising from the weakening of Indonesian Rupiah and Brazilian Real against the US dollar during the periods.

Review of Financial Position

Total non-current assets of Rp35.3 trillion in December 2015 were 6% or Rp2.0 trillion higher than December 2014. The increase was principally attributable to the following:-

- Additions of biological assets of Rp1.0 trillion mainly due to oil palm new plantings and immature plantations, as well as capital expenditure relating to housing and infrastructure, machineries and equipment, as well as expansion of production capacity;
- Recognition of higher deferred tax assets relating to higher employee benefits liabilities and tax losses carried forward;
- Increase in Investment in associate companies of Rp0.8 trillion was relating (a) additional capital injection US\$15.3 million (equivalent to Rp197 billion) in FPNRL; and (b) acquisition of a 50% stake in Asian Assets Management Pte. Ltd. (AAM) for US\$39 million (equivalent to Rp519 billion) in June 2015 by PT PP Lonsum Sumatra Indonesia Tbk (Lonsum); and
- Higher advances for plasma project.

The increase was partly offset by lower advances and prepayments relating to the purchase of fixed assets, and lower carrying value of Investment in CMAA which mainly due to the recognition of foreign currency translation loss and share of losses in FY2015.

Total current assets of Rp5.4 trillion in December 2015 were 21% lower than Rp6.8 trillion in December 2014. The decline was mainly due to lower cash levels. However this was partially offset by higher inventories arising from higher CPO and sugar at plantations, as well as higher CPO stocks at refineries.

As of December 2015, total current liabilities of Rp6.5 trillion were 7% lower than last year end of Rp7.0 trillion. This was mainly attributable to the refinancing of certain short-term facilities to long-term loans in 4Q2015; and lower income tax payable in line with lower profit in 2015.

Total non-current liabilities of Rp10.0 trillion in December 2015 were 6% higher than Rp9.5 trillion at December 2014. This was mainly due to the refinancing of certain short-term facilities to long-term loans as explained above. However this was partially offset by higher deferred tax liabilities.

The Group managed to lower its negative working capital from Rp2.4 trillion in September 2015 to Rp1.1 trillion in December 2015. The Group continues to review its funding alternatives to optimize its capital structure and current ratio.

Review of Cash Flows

The Group generated lower net cash flows from operations of Rp1.7 trillion in FY2015 compared to Rp2.8 trillion in FY2014. The decline was mainly due to a lower operating profit in FY2015. The Group recorded higher depreciation and amortization during the periods arising from additions of fixed assets.

Net cash flows used in investing activities in FY2015 was Rp3.4 trillion. This comprised principally capital expenditure relating to additions of fixed assets, biological assets and advances for projects of Rp2.2 trillion, and further investment in associate companies and a JV of Rp0.9 trillion. In 2015, no net proceeds were raised from financing activities. As a result, Group cash levels declined from Rp3.6 trillion at December 2014 to Rp2.0 trillion at December 2015.

9. **Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results.**

Not applicable.

10. **A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months.**

The market conditions remain challenging for commodity sectors. The persistent slump in commodity prices and slower growth in some key markets like China have led to a prolonged period of volatility and uncertainty. Global developments remain uncertain and unpredictable. These circumstances have aggravated the complex mix peculiar to any agribusiness such as the weather, export restrictions, the higher co-relationship between the prices of crude oil and various commodities, and the performance of competing crops such as soybean oil.

As a diversified and vertically integrated agribusiness with a dominant presence in Indonesia, our operations continue to be supported by positive market drivers that include good demographics, increasing urbanisation and a fast-growing middle class with rising discretionary incomes.

Our outlook for the agribusiness remains optimistic but we are cautiously managing our activities during this challenging period to mitigate risks and exposures. We will place a stronger emphasis on extracting the optimal from our value chain, and proactively improve operations, increase yields, raise productivity and control costs.

11. **If a decision regarding dividend has been made.**

(a) Current Financial Period Reported On

Any dividend recommended for the current financial year reported on? Yes.

The Directors have recommended to the Company to pay a first and final dividend in respect of the financial year ended 31 December 2015. The details of the dividend will be announced before the end of March 2015.

The payment of the dividend will be subject to the approval by shareholders at the forthcoming AGM to be convened in end April 2015.

(b) Corresponding Period of the Immediately Preceding Financial Year

Type of dividend: First and final dividend
 Dividend type: Cash
 Dividend per share: S\$0.0052

12. If no dividend has been declared (recommended), a statement to that effect.

No applicable.

13. Segmented revenue and results for business or geographical segments (of the group) in the form presented in the issuer's most recently audited annual financial statements, with comparative information for the immediately preceding year

BY THE ORDER OF THE BOARD

Mark Julian Wakeford
 Chief Executive Officer and Executive Director

26 February 2016

FOR IMMEDIATE RELEASE

IndoAgri posts a profit of Rp175 billion (S\$18 million) in 4Q15

HIGHLIGHTS:

- **4Q15 results affected by soft commodity prices, but negated by higher sales volume of palm products and a reversal of forex losses**
- **Revenue down 10% yoy in 4Q15 on lower sales achieved by both divisions**
- **Attributable profit improved significantly from a loss of Rp154 billion in 3Q15 to a profit of Rp175 billion in 4Q15**
- **A strong quarter for FFB nucleus and CPO production, up 14% yoy. FY15 CPO production crossed 1.0 million MT, up 5% yoy**

SINGAPORE – 26 February 2016 – SGX Mainboard-listed IndoAgri (the “Group”), a diversified and integrated agribusiness group and manufacturer of leading brands of edible oils and fats products in Indonesia, posted 4Q15 revenue of Rp3.8 trillion (S\$387 million), down 10% yoy on lower revenue contribution from both divisions. FY15 revenue declined 8% to Rp13.8 trillion mainly attributable to lower revenue contribution from the Edible Oils & Fats (EOF) Division, partially offset by higher external sales from the Plantation Division.

Plantation Division’s revenue declined 10% and 11% yoy in 4Q15 and FY15, respectively. This reflected mainly lower average selling prices of palm products, but partially offset by higher sales volume of palm products and higher sugar sales.

Despite lower commodity prices, the Group recovered from last quarter's loss to a profit in 4Q15 on higher sales volume of palm products and a reversal of forex losses. However, FY15 results remained soft on lower commodity prices, forex losses and share of losses in CMAA. Core profit was Rp168 billion (S\$17 million) in 4Q15 and Rp555 billion (S\$57 million) in FY15, declining 58% and 60% yoy over the comparative periods in 2014.

“The Group achieved solid production growth. FY15 FFB nucleus and CPO production increasing 5% yoy to 3,414,000 tonnes and 1,002,000 tonnes, respectively. However FY15 results remained soft, affected negatively by weakening commodity prices in all 3 of our main crops – palm oil, rubber and sugar, as well as forex losses. On a positive note, our EOF Division achieved higher earnings in FY15 on lower raw material costs which primarily comprised of CPO.

As of December 2015, we have 59,000 hectares of immature oil palm plantation, ensuring future volume growth.”, commented Mr Mark Wakeford, CEO and Executive Director.

INDUSTRY OUTLOOK AND FUTURE PLANS

The market conditions remain challenging for commodity sectors. The persistent slump in commodity prices and slower growth in some key markets like China have led to a prolonged period of volatility and uncertainty. Global developments remain uncertain and unpredictable. These circumstances have aggravated the complex mix peculiar to any agribusiness such as the weather, export restrictions, the higher co-relationship between the prices of crude oil and various commodities, and the performance of competing crops such as soybean oil.

As a diversified and vertically integrated agribusiness with a dominant presence in Indonesia, our operations continue to be supported by positive market drivers that include good demographics, increasing urbanisation and a fast-growing middle class with rising discretionary incomes.

Our outlook for the agribusiness remains optimistic but we are cautiously managing our activities during this challenging period to mitigate risks and exposures. We will place a stronger emphasis on extracting the optimal from our value chain, and proactively improve operations, increase yields, raise productivity and control costs.

--The End ---

ABOUT INDOAGRI

Indofood Agri Resources Ltd. (“IndoAgri”) is a diversified and integrated agribusiness group with principal business operations that range from research and development, breeding and cultivation of oil palms, to the milling and refining of crude palm oil, and the marketing and distribution of cooking oil, margarine, shortening and other derivative products. The Group also engages in the cultivation of other crops such as rubber, sugar cane, cocoa and tea.

As of end December 2015, IndoAgri has 300,633 hectares planted with oil palm, rubber, sugar cane, cocoa and tea.
