Profit margin for this division maintained close to Year 2006 despite increasing cost pressure.

Commodity division registered an increase in external revenue of 62.2% to Rp1.16 trillion in Year 2007. The revenue growth was largely attributable to the increase in the average selling price of palm oil-based and copra-based products as well as higher export of copra-based products. This division swung from a loss of Rp34 billion a year ago to profit from operations of Rp17 billion in Year 2007 as a result of improving operations.

Gain arising from changes in fair values of biological assets for Year 2007 was approximately Rp202 billion, the gain reflected largely higher CPO prices.

Biological assets comprise oil palm plantations, rubber plantations and other crops. Mature oil palm trees produce fresh fruit bunches ("FFB"), which are used to produce CPO and palm kernel oil ("PKO"). The fair values of oil palm plantations as at 31 December 2007 are determined by an independent valuer, PT Asian Appraisal Indonesia, using the discounted future cash flows of the underlying plantations. The expected future cash flows of the oil palm plantations are determined using the forecast market price of FFB which is largely dependent on the projected selling prices of CPO and PKO in the market.

Profit from Operations for FY2007 increased by 36.0% or Rp424 billion compared to same period last year. The improvement in profits attributed largely by higher gross profit of Rp955 billion, but offset partly by lower gain arising from changes in fair values of biological assets, higher G&A expenses due to primarily to increase in headcount and wage inflation. Other operating expenses increased significantly largely attributed to foreign currency loss of Rp71 billion arising from the translation of US\$ denominated loan, hedging loss of Rp29 billion relating to commodity future contracts and expenses incurred in respect of bank facilities for plasma project of Rp43 billion.

Net Profit After Tax of the Group increased by 34.4% or Rp255 billion to close at Rp1 trillion in FY2007 against same period last year with similar reasons noted as above. Higher interest expenses incurred in Year 2007 were largely related to the borrowings obtained by PT Salim Ivomas Pratama ("PT SIMP") to fund the acquisition of Lonsum.

Review of Financial Position

Biological assets increased primarily due to new acquisitions during the years including the acquisition of plantation companies from Rascal, MISP and Lonsum. Similarly, these acquisitions also contributed largely to the increase in property, plant and equipment, prepaid land premiums and deferred land right costs, as well as goodwill.

Interest bearing loans and borrowings increased significantly largely contributed to the short term bridging loans of Rp4 trillion obtained by PT SIMP to fund the acquisition in Lonsum.

INDOFOOD AGRI RESOURCES Ltd.

The group's net assets as of 31 December 2007 were Rp9.8 trillion compared to Rp3.5 trillion in Dec 2006, largely contributed by the acquisition of subsidiaries during the year and positive cash flow generated from the operations.

9. Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results.

Not applicable.

10. A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months.

As announced by the Company on 30 October 2007, PT SIMP had completed the acquisition of 56.4% shareholding interest in Lonsum, accordingly Lonsum became a subsidiary of the Company. The Company acquired a further 8% interest in Lonsum on 2 November 2007 and then an additional 0.01% following the completion of a tender offer by PT SIMP on 17 December 2007, thus increasing the Group's shareholding interest in Lonsum to 64.42%.

For further information on the acquisition, please refer to the Company's circular to shareholders dated 2 October 2007 which is available on <u>www.sgx.com</u>.

Barring unforeseen circumstances, this acquisition in Lonsum is expected to contribute positively to the Group's earnings per share and net tangible asset.

The fundamental for palm oil remains strong primarily by the surge in demand for edible oils from booming economies, population growth and increasing consumption per capita, notably in China and India.

We envisage rising wages, production costs and inflation will be the major cost challenges in Year 2008. However, the strengthening of our integrated business model in 2007 will enable us to position for strong growth.
